DEPARTMENT OF PARKS AND RECREATION

# ANNUAL PROGRAM

FY 2017

**BARRY GLASSMAN**  
HARFORD COUNTY EXECUTIVE

**BILLY BONIFACE**  
DIRECTOR OF ADMINISTRATION

**KATHY L. BURLEY**  
ACTING DIRECTOR OF PARKS & RECREATION

August 5, 2016

Ms. Carrie Lhotsky  
Program Administrator  
Maryland Department of Natural Resources  
Tawes State Office Building, E-4  
580 Taylor Avenue  
Annapolis, MD 21401

Dear Ms. Lhotsky:

Attached please find Harford County's FY2017 Annual Program, submitted in accordance with the requirements of Program Open Space. This Annual Program includes all projects in the Parks and Recreation Capital Budget to provide an overview of the Department's activities. With the significant reductions in both Program Open Space revenues and local recordation taxes, available funding was focused on construction of a priority project serving multiple recreation councils, maintenance of existing facilities and partnership projects with agencies such as Harford County Public Schools. These funds are an important element of the County's strategy to meet the goals of the 2012 Land Use Element Plan, as well as, the recently adopted 2016 Master Plan, known as HarfordNEXT, and the 2013 Land Preservation, Parks and Recreation Plan and meet the needs of our growing population. Even in these difficult economic times, we must continue to acquire land as it becomes available, develop new facilities and improve existing recreation infrastructure in order to maintain the quality of life so important to our citizens.

We have incorporated the Twelve Visions from the 2009 Smart, Green and Growing Legislation into this Annual Program with the assistance of our Department of Planning and Zoning. We believe that our lands for open space and recreation facilities are consistent with the intent of these Twelve Visions.

Your prompt review of this program will be greatly appreciated. If you have any questions or require any clarification, please contact Paul Magness at 410-638-4753 X7639.

Yours truly,

Paul Magness, Deputy Director  
Harford County Department of Parks and Recreation

**MEMORANDUM**

**TO:** Paul S. Magness  
Deputy Director, Department of Parks and Recreation

**FROM:** Bradley F. Killian *BPK*  
Director, Department of Planning and Zoning

**SUBJECT:** Draft FY 2017 Program Open Space Annual Program

Per your request, the Department of Planning and Zoning has reviewed the draft FY17 POS Annual Program. The Department finds that the proposed Program is consistent with the goals and objectives of the County's 2012 Master Plan and the recently adopted 2016 Master Plan, known as HarfordNEXT. The Department also finds that the proposed Program is consistent with the State's 12 Visions of the Smart, Green and Growing Act.

Thank you for the opportunity to review the draft FY17 POS Annual Program. If you have any further questions, please feel free to contact this office.

**cc:** Jenny King, Deputy Director, Department of Planning and Zoning  
Shane P. Grimm, Chief, Long-Range Planning

# 12 Planning Visions

Maryland's Planning Visions law (from 2009) created 12 Visions which reflect more the State's ongoing aspiration to develop and implement sound growth and development policy. The visions address: quality of life and sustainability; public participation; growth areas; community design; infrastructure; transportation; housing; economic development; environmental protection; resource conservation; stewardship; and implementation approaches. See the descriptions of the Visions below.

Local jurisdictions are required to include the visions in the local comprehensive plan and implement them through zoning ordinances and regulations.

## Maryland's Twelve Planning Visions

### 1. **Quality of Life and Sustainability:**

A high quality of life is achieved through universal stewardship of the land, water, and air resulting in sustainable communities and protection of the environment.

### 2. **Public Participation:**

Citizens are active partners in the planning and implementation of community initiatives and are Sensitive to their responsibilities in achieving community goals.

### 3. **Growth Areas:**

Growth is concentrated in existing population and business centers, growth areas adjacent to these centers, or strategically selected new centers.

4. **Community Design:**

Compact, mixed–use, walkable design consistent with existing community character and located near available or planned transit options is encouraged to ensure efficient use of land and transportation resources and preservation and enhancement of natural systems, open spaces, recreational areas, and historical, cultural, and archeological resources.

5. **Infrastructure:**

Growth areas have the water resources and infrastructure to accommodate population and business expansion in an orderly, efficient, and environmentally sustainable manner;

6. **Transportation:**

A well–maintained, multimodal transportation system facilitates the safe, convenient, affordable, and efficient movement of people, goods, and services within and between population and business centers;

7. **Housing:**

A range of housing densities, types, and sizes provides residential options for citizens of all ages and incomes;

8. **Economic Development:**

Economic development and natural resource–based businesses that promote employment opportunities for all income levels within the capacity of the State’s natural resources, public services, and public facilities are encouraged;

9. **Environmental Protection:**

Land and water resources, including the Chesapeake and coastal bays, are carefully managed to restore and maintain healthy air and water, natural systems, and living resources;

10. **Resource Conservation:**

Waterways, forests, agricultural areas, open space, natural systems, and scenic areas are conserved;

11. **Stewardship:**

Government, business entities, and residents are responsible for the creation of sustainable communities by collaborating to balance efficient growth with resource protection; and

## 12. Implementation:

Strategies, policies, programs, and funding for growth and development, resource conservation, infrastructure, and transportation are integrated across the local, regional, state, and interstate levels to achieve these Visions.

**DEPARTMENT OF NATURAL RESOURCES  
PROGRAM OPEN SPACE  
MARYLAND DEPARTMENT OF PLANNING  
ANNUAL PROGRAM  
FY 2017**

**I. INTRODUCTION**

The Harford County Annual Program for the use of Program Open Space funds is developed each year by the Department of Parks and Recreation in conjunction with the Capital Budget and Capital Improvement Program. Requests for capital improvement and acquisition projects are received from the 22 recreation councils throughout the County. The three incorporated municipalities submit requests in conjunction with their Recreation Committees. Additionally, input is requested and received from the Harford County Department of Planning & Zoning, Harford County Facility and Operations, Planning Advisory Board, Harford County Public Schools, Harford County Public Library, Parks and Recreation Advisory Board, and the Department of Parks and Recreation staff.

The capital project requests for FY 2017 were reviewed by Department staff and recommendations for Departmental priorities developed. In September 2015, the Recreation Council Presidents reviewed the council and Departmental requests and voted on priority ranking for projects. Both staff and the Recreation Council Presidents utilized the following criteria:

- (1) Does the project support the goals and policies set forth in the Harford County Land Preservation and Recreation Plan?
- (2) Is the project included in the Department's 10-Year Capital Improvement Program?
- (3) Is the project a priority for reasons of critical need, safety, maintenance or environmental concerns?
- (4) Is this project in response to identified community needs or desires?
- (5) Is this project necessary to complete a previously approved project?
- (6) Should the construction be included with the initial phase of development for efficiency or practicality?

The recommendations and rankings of the Recreation Council Presidents and the Department staff were reviewed by the Department administration and a proposed budget was formulated. This budget reconciled the estimated costs of the projects with the anticipated funding levels. The proposed budget implemented the policies, goals and objectives of the 2013 Land Preservation, Parks and Recreation Plan, the 2012 Harford County Master Plan and Land Use Element Plan, and community plans adopted as part of state and local Smart Growth and revitalization efforts.

The projects included in the Annual Program and Capital Budget support the Twelve Visions of the Maryland Economic Growth Resource Protection and Planning Act of

1992 and are consistent with the Smart Growth Act of 1997. With continued sluggish revenues anticipated from both Program Open Space and local recordation taxes, emphasis was placed on the completion of designed projects and on partnership projects with agencies such as Harford County Public Schools. The acquisition of land and the development of new facilities to support the anticipated population growth will continue to be a priority. The maintenance and improvement of existing infrastructure is also important in order to utilize current facilities to their fullest extent.

The Planning Advisory Board and the Parks and Recreation Advisory Board reviewed the Department's proposed budget and provided comments to the County Executive and County Council. The Department's proposed Capital Budget was approved by the County Executive and forwarded to the Harford County Council for review, approval and funding. The County Council approved the Department's Capital Budget in May 2016.

This Annual Program provides an overview of the entire acquisition and development program of the Department of Parks and Recreation. Other grant programs including Transportation Alternatives Program funds and the Waterway Improvement Program will be utilized as they are available for related projects. The County also dedicates a portion of the recordation tax revenue to parks and recreation acquisition and development projects as well as providing paygo and bond funding for major projects. The full list of capital expenditures in fiscal year 2017 and proposed projects for FY 2018–2023 can be found in the Harford County Budget and Capital Improvement Program.

## II. **ACQUISITION PROJECTS**

The land acquisition goals included in the Harford County Land Preservation and Recreation Plan establish priorities for both resource and non-resource open space in identified areas of the County. Where possible, the Department will strive to acquire lands that can serve a variety of leisure and preservation needs including active recreation facilities in both regional and community parks and conservation of wooded tracts and environmentally sensitive areas. Partnerships with advocacy groups can further efforts for preservation of historic structures and sites as well as unique natural features. The acquisition of active and passive recreation lands throughout the County will be in fulfillment of the goals of the 2012 Master Plan and Land Use Element and the 2013 Land Preservation, Parks and Recreation Plan. These acquisitions will provide land to meet the current and future recreation needs, to protect environmentally sensitive areas and to provide a wide variety of passive recreational pursuits including the acquisition of waterfront property. Goal PR-1 states “**Continue to acquire additional recreation land, including waterfront properties to help meet the needs of current and future residents**”. Census 2010 data shows Harford County continues to be one of the fastest growing Baltimore Metropolitan Area counties. Creative purchasing arrangements such as multi-year installment contracts may be used in certain instances to maximize options in light of available funding.

- A. Darlington (Kirkwood Property) Acquisition – This project proposes the acquisition of a 26.76 acre parcel of land at 1143 Main Street, in Darlington. The parcel is close to the downtown area and approximately 24 acres will be developed into a park site. The acquisition would provide access to fields available for Recreation Council activities and the community at large. The acquisition of this land supports Goal PR-1 “**Continue to acquire additional recreation land, including waterfront properties, to help meet the needs of current and future residents**” and Goal PR-4 “**Provide active and healthy lifestyle opportunities for Harford County residents**” of the 2013 Land Preservation, Parks and Recreation Plan. The project supports Visions 1, 3, and 4 of the Twelve Visions.
- B. Emmorton Acquisition - This project proposes the acquisition of a site for development of an active park site in the Emmorton area of the County. The acquisition would provide access to fields available for Recreation Council activities and the community at large. The acquisition of this land supports Goal PR-1 “**Continue to acquire additional recreation land, including waterfront properties, to help meet the needs of current and future residents**” and Goal PR-4 “**Provide active and healthy lifestyle opportunities for Harford County residents**” of the 2013 Land Preservation, Parks and Recreation Plan. The project supports Visions 1, 3, and 4 of the Twelve Visions.
- C. Forest Hill Acquisition - This project proposes the acquisition of a 23-acre site for development of an active park site in the Forest Hill area of the County. The acquisition would provide access to fields available for Recreation Council activities and the community at large. The acquisition of this land supports Goal PR-1 “**Continue to acquire additional recreation land, including waterfront properties, to help meet the needs of current and future residents**” and Goal PR-4 “**Provide active and healthy lifestyle opportunities for Harford County residents**” of the 2013 Land Preservation, Parks and Recreation Plan. The project supports Visions 1, 3, and 4 of the Twelve Visions.
- D. Ma & Pa Trail (Hooper Property) Acquisition – This project proposes the acquisition of approximately 11,100 square feet of land and a temporary construction easement, approximately 5,550 square feet, located at 440 Franklin Street in the Bel Air Community. The land lies on the western edge of the property at 440 Franklin Street. This property would provide the necessary land for construction of the connecting section of the Ma & Pa Heritage Trail. This purchase would provide the vital link between the Williams Street trailhead and the Blake’s Venture Park trailhead to be constructed. The ultimate construction of this portion of the trail will connect five County park sites through the Town of Bel Air. This project supports Goal PR-1 “**Continue to acquire additional recreation land, including waterfront properties, to help meet the needs of current and future residents**” and Goal PR-2 “**Develop integrated greenway/trail systems with both public and private**

**segments”** of the 2013 Land Preservation, Parks and Recreation Plan. This project supports Visions 1, 3, 4, 6, 8 and 12 of the Twelve Visions.

- E. Willoughby Beach Road Acquisition – This project proposes the acquisition of a 50.262-acre parcel of land on Willoughby Beach Road. This parcel is adjacent to the Gertrude Parks property that was acquired in 2004. The purchase will preserve a total tract of 95.762 acres in the densely developed Willoughby Beach Road peninsula. The site will serve a southern gateway for the Anita C. Leight Estuarine Research Reserve, an established partnership of Harford County, the Izaak Walton League, the State of Maryland and the National Oceanic and Atmospheric Administration and could be developed for both active and passive uses. This project implements Goal PR-1, **“Continue to acquire additional recreation land, including waterfront properties, to help meet the needs of current and future residents”** and Goal PR-3 **“Monitor usage trends and add recreational opportunities and facilities that meet the needs of all segments of the public”** of the 2013 Land Preservation, Parks and Recreation Plan. This project supports Visions 1, 9 10, and 11 of the Twelve Visions.

The attached Annual Program for Acquisition provides for detailed information concerning the above-noted acquisition projects.

### **III. DEVELOPMENT PROJECTS**

The 2013 Land Preservation, Parks and Recreation Plan established County goals for the development of facilities to meet the leisure needs of its citizens. The plan provides for developing parks and school sites for compatible recreation uses. Through its planning policies and Capital Budget, Harford County supports the Smart Growth efforts of the State of Maryland. While the County emphasizes the development of facilities to serve the Priority Funding areas (the Development Envelope and Rural Villages identified in the 2012 Land Use Element Plan), the need for facilities in rural areas, as well as the need for regional facilities must also be addressed. The majority of the development projects are in or adjacent to the Development Envelope and the municipalities in support of the Twelve Visions and the State Smart Growth policies. The following projects proposed in the FY 2017 Annual Program lie within the Development Envelope:

- Anita C. Leight Center Improvements
- Demarco Memorial Park Improvements
- Emily Bayless Graham Park
- Emmorton Recreation and Tennis Center Improvements
- Flying Point Park Improvements
- Indoor Recreation Facility – Forest Hill/Hickory
- Rockfield Park Improvements
- Swan Harbor Farm Improvements
- Tydings Park Improvements

Many of the projects such as Anita C. Leight Center Improvements, Emmorton Recreation and Tennis Center Improvements, Indoor Recreation Facility-Forest Hill/Hickory, and Swan Harbor Farm Improvements are renovations and improvements to existing facilities.

The FY17 Annual Program identifies continued funding for renovation of existing playgrounds throughout the County to meet current safety standards and maintain the quality of life in existing communities. A strong partnership has developed between Harford County Public Schools, the Department of Parks and Recreation, community advocacy groups, such as the Greater Bel Air Community Foundation, and numerous elementary school Parent Teacher Associations to improve playgrounds at school sites. These facilities serve the school population during the day and the community at large after hours. Additionally, there is money identified in the FY17 budget for parks and facilities including Churchville Center Renovations and Eden Mill Park. Other projects for the maintenance and upgrade of existing facilities include the repair and coating of existing tennis and multipurpose courts at schools identified in priority order by the Department and Public Schools.

Individual projects are listed on the attached FY 2017 Annual Program for Development indicating name/type of project, the vision addressed, details of the development, acreage to be developed, projected costs, and the funding sources. The Recreation Area served is also noted on the chart, making provisions for those projects that occur in a number of locations and projects at specialized facilities benefiting the entire County. The chart describes each project and the facilities to be constructed.

#### **IV. LOCATION MAPS**

Maps indicating the location of each project follow the charts. The locations of all pertinent projects are shown on the attached maps. The projects serving the County as a whole are not identified on a map.
